## The Bethpage

Step into the Bethpage — a beautifully designed 1,955-square-foot home that captures the ease and comfort of single-level living. Natural light fills the open floorplan, where vaulted ceilings and hardwood floors enhance the home's spacious, airy feel. At the heart of it all is a spacious kitchen with a generous island — perfect for cooking, gathering, and creating memories. Every finish is chosen for both beauty and function, bringing warmth and sophistication to each room. At our award-winning Design Center, you can personalize every detail to fit your lifestyle and taste. The Bethpage is also a Zero Energy home, built with

innovative materials and smart technology that make your home more efficient, comfortable, and rewarding to live in.
